V. Kumaran	The constitutive relation for the granular flow of rough particles, and its application to the flow down an inclined plane	1
V. Kumaran	Granular flow of rough particles in the high-Knudsen-number limit	43
P. Billant, D. G. Dritschel & J.-M. Chomaz	Bending and twisting instabilities of columnar elliptical vortices in a rotating strongly stratified fluid	73
A. Scotti, R. Beardsley & B. Butman	On the interpretation of energy and energy fluxes of nonlinear internal waves: an example from Massachusetts Bay	103
K. Chang, G. Constantinescu & S.-O. Park	Analysis of the flow and mass transfer processes for the incompressible flow past an open cavity with a laminar and a fully turbulent incoming boundary layer	113
R. N. Govardhan & C. H. K. Williamson	Defining the 'modified Griffin plot' in vortex-induced vibration: revealing the effect of Reynolds number using controlled damping	147
S. Y. Annenkov & V. I. Shrira	Role of non-resonant interactions in evolution of nonlinear random water wave fields	181
M. Dentz, D. M. Tartakovsky, E. Abarca, A. Guadagnini, X. Sanchez-Vila & J. Carrera	Variable-density flow in porous media	209
D. G. Dritschel & J. Vanneste	Instability of a shallow-water potential-vorticity front	237
F. Marques & J. M. Lopez	Onset of three-dimensional unsteady states in small-aspect-ratio Taylor–Couette flow	255
P. Orlandi, S. Leonardi & R. A. Antonia	Turbulent channel flow with either transverse or longitudinal roughness elements on one wall	279
J. M. Nordbotten & M. A. Celia	Similarity solutions for fluid injection into confined aquifers	307
J. C. del Álamo, J. Jiménez, P. Zandonade & R. D. Moser	Self-similar vortex clusters in the turbulent !ogarithmic region	329
A. Randriamampianina, W.-G. Früh, P. L. Read & P. Maubert	Direct numerical simulations of bifurcations in an air-filled rotating baroclinic annulus	359
Y. Li & C. C. Mei	Subharmonic resonance of a trapped wave near a vertical cylinder in a channel	391
M. Francius & C. Kharif	Three-dimensional instabilities of periodic gravity waves in shallow water	417
P. D. M. Spelt	Shear flow past two-dimeensional droplets pinned or moving on an adhering channel wall at moderate Reynolds numbers: a numerical study	439
O. Le Métayer & R. Saurel	Compressible exact solutions for one-dimensional laser ablation fronts	465
